**Re: Condensate Collection and Treatment System: HAP, Methanol, and TRS Performance Test – Conducted June 23 - July 11, 2021**

Dear Mr. Hobson,

The Department, in coordination with EPA, has reviewed the referenced test report and information request response dated October 5, 2021, and have the following questions and comments. Please provide responses by December 23, 2021. Responses must be submitted to Michael Shroup at [shroupmd@dhec.sc.gov](mailto:shroupmd@dhec.sc.gov). Responses to these comments and questions may elicit additional questions. Once all items are addressed, a final revision to the test report will be requested.

**Condensate Collection and Treatment System: HAP, Methanol, and TRS Performance Test – Conducted June 23 - July 11, 2021**

1. Please provide the daily hydrogen peroxide injection rate at the outlet to No. 1 Holding pond for June 23 – July 11, 2021.
2. Was any supplemental O<sub>2</sub> added at any location during the performance test? If so, please provide the locations and injection rates for June 23 – July 11, 2021.
3. For the revised Table 3-3, elaborate on the updated procedures used to calculate the F<sub>bio</sub> and F<sub>air</sub> values. How were the F<sub>bio</sub> and F<sub>air</sub> values calculated for the individual TRS compounds?

If I can be of further assistance, please contact me at (803) 898-3856 or email me at [monroedn@dhec.sc.gov](mailto:monroedn@dhec.sc.gov).

Sincerely,

David N. Monroe
